Composers of Space:

Landart Design is a landscape+interior design studio with a team of credible designers in Penang, Kuala Lumpur and Singapore from diverse background. Under the leadership of our three directors - LAr. Phua Chin Eng, Anuar Ali and LAr. Norfanty Shaariffin, our team consists of professionals in landscape architecture, architecture, urban planning and interior design.

Since 1998, Landart has been working on various projects with notable artistic landscape throughout Malaysia, Singapore, Indonesia, Vietnam and Abu Dhabi. Our design philosophy is to create an ensemble that engages the senses through the elements of texture, color, light, shape and space that show the natural balance between functional and art of a successful design.

In relation to music that works with sound, our design uses its space as a means to collaborate the sensual, artistry, ceremony and living elements to bring it to life, thus enhancing the sensuous experience of the composed space, for both the users and the habitat.

The works of Landart is widely recognized for the quality it has set and we would like our works to be part of contribution to a sustainable community.

Come and join us at the “Kopitiam Open Studio” IFLA 2020 to know about the way we compose the ideas to create an environment with artistic melody for people to enter, apart from fulfilling the needs of our Clients.
