Established in 1990, Pentago Landscape Sdn Bhd is one of the pioneering Landscape architecture companies still practising in Malaysia. Pentago has been an integral part of the growth of the profession in this region, and have participated in the education, expansion and development of landscape architecture from its infancy in Malaysia to the respectable and established profession it is today.

Pentago’s philosophy has always been to ‘Thread lightly’ on the ground ‘Treat Mother Earth’ with respect, work with the natural features on the site. The trees, rivers, lakes, ponds, hills and valley will always take precedence over the buildings and structures.

Our design principles and award winning landscapes were showcased in a celebrated coffee book published in 2013 titled ‘Outside In, Designed by Pentago’ which sold over 4,000 copies worldwide.

Our head office is in Kuala Lumpur Malaysia and over the years we have fluctuated between 150 staff with offices in Melbourne-Australia, Ho Chi Minh City-Vietnam, Bahrain-UAE and of course Kuala Lumpur-Malaysia. We presently house approximately 45 staff in our new home ‘Pentago House’ which is a double fronted, 2 level 112 years old shop house. The last remaining pre-war shop house in Kampung Attap. ‘Pentago House’ has a lot of history and a lot of ‘soul’.

Come and join the founders of Pentago at the ‘Kopitiam Open Studio’ event and hear about the evolution of the landscape architectural story in Malaysia.
